"Birds are something ladybugs worry about, you know." .Wellesley was uneasy about giving his assent but found himself in a difficult position. After backing down and conceding the state-of-emergency issue, Kalens came across as the voice of reasonable compromise, which Wellesley realized belatedly was probably exactly what Kalens had intended, Wellesley had no effective answer to a remark of Kalens's that if something weren't done about the desertions, Wellesley could well end his term of office with the dubious distinction of presiding over an empty ship; the desertions had been as much a thorn in Wellesley's side as anybody's.."Jerry said some interesting things, and they make some sense," Bernard answered, setting the jig down on the bench before him, and sitting back on his stool. "Fanatics are gullible fools. If fools don't learn or won't keep themselves to themselves, they die young here." .That touched at what was really at the bottom of it all. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was More to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. Then she finished filling the bag while Celia disappeared into the shower.."The kids like having them around," Sal confirmed. "And to be honest, I suppose we do too. We've all grown up with them." .Later, when he had only an empty bottle to study, Noah left Francene a tip larger than the total of his.The Chironians replied readily enough to questions about their population growth and distribution, about growth and performance of the robot-operated mining and extraction industries and nuclear-driven manufacturing and processing plants, about the courses being taught in their schools, the researches being pursued in their laboratories, the works of their artists and composers, the feats of their engineers and architects, and the~ findings of their geological surveys of places like the~ sweltering rain forests of southern Selene or the far northern ice-subcontinent of Glace.."Very wise, Sergeant.
