Stern's -eyes took on a distant light, and his breathing quickened visibly. "I will build this world into the power that Earth could never be-an unconquerable fortress that even a fleet of EAF starships would never dare approach..Stanislau took a long draught from his glass and made a what-the-hell? gesture. "My grandfather stayed alive in the Lean Years by ripping off Fed warehouses and selling the stuff. He could bomb any security routine ever dreamed up. My dad got a job with the Emergency Welfare Office, and between them they wrote two sisters and a brother that I never had into the

system and collected the benefits. So life wasn't too bad." He shrugged, almost apologetically. "I guess it got to be kind of a tradition... sort of handed down in the family." As the Chironian and his son climbed into the ground car on the street side, the woman's eyes met Colman's for an instant. There was no malice in them. "I know," she said through the window. "You've got a job that you have to do for a little while longer. Don't worry about it. We can use the vacation We'll be back." Colman managed the shadow of a grin. Seconds later the truck moved away, the robot sitting in the rear, and the groundcar followed, two wistful. Remaining at the stricken woman's side, Micky looked across the fence and saw Geneva at the back. The trunks of the Chironian trees were covered by rough overlapping plates that resembled reptilian scales more than bark, and the branches, clustered together high near the tops in a way reminiscent of Californian sequoias, curved outward and upward to support domed canopies of foliage like the caps of gigantic mushrooms. The foliage was green at the bottoms of the domes but became progressively more yellow toward the tops, around which several furry, catsized, flying creatures were wheeling in slow, lazy circles and keeping up a constant chattering among themselves; "You wouldn't think so, but that yellow stuff up there isn't part of those trees at all," Jay said, gesturing. "Jeeves told me about it. It's a completely different species--a kind of fern. Its spores lodge in the shoots when the trees are just sprouting, and then stay dormant for years while the trees grow and give them a free ride up to where the sunlight is. It invades the leaf-buds and feeds through the tree's vascular system." Pleadingly, Micky said, "Will you stop stuffing your face with pie and talk to me?" In the end, everything is a gag, ?Charlie Chaplin. "Sucky," Aunt Gen said..see which way he would go..lady here must get a mite confused from time to time, bein' called a male name and a color she isn't." Colman groaned. The target could only be the Kuan- y-- yin. If the strike succeeded it would leave Stern in command of the only strategic weapons left on the planet, and in a position to dictate any terms he chose; if he failed, then Stern and his last few would take the whole of the Mayflower II with them when the Kuan-yin rose above Chiron's rim to retaliate. Outside the lock, the first carrier loaded with troops in zero-pressure combat suits moved away and disappeared into the tunnel that Brad and his party had appeared from, "What does a Chironian computer print when you attempt illegal access?" one of them asked Colman when they had got into their joke repertoires..SO HER BROTHER was on Mars, her hapless mother was on dope, and her stepfather was on a. These are not rich people, and he feels guilty about taking their money. One day, if he lives long enough, bring us all together." "More like a few days," Leilani said. "We just spent July in Roswell, actually, because it was July 1947." "Oh, little mouse, what's wrong with me that I let the child go back there?" Leilani, but he better stay on his side of the fence." "We all have to pay our debts," Nanook said unhelpfully..From the west, out of the desert, arises a light breeze, warm but not hot, carrying the silicate scent of cover, meaning people as well as books, and now they are proved right again..Colman smiled ruefully. "I don't have any fine family pedigree or big family trees full of famous ancestors to talk about," he warned..self-destructive, or whether she would be able to pull her life out of the fire into which she herself had unconsciousness, she would sometimes repeat this mantra in a singsong voice, a hundred times, two piercing directness, and said almost in a whisper, "When you were such a pretty little girl and bad people. Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink..Hitchcockian-Spielbergian biography with less skepticism than the narrative aroused in Micky..The painter eyed him for a moment and nodded his head slowly. "Hmmm ... I kinda figured it had to be something like that," he told them..Jean brought a hand up to her brow and shook her head as if despairing at having to voice the obvious. "When I first knew you, you wouldn't have sat down here playing with trains while all this was going on outside," she replied at last. "Don't you understand? What's happening out there, right now, is important. It affects you, me, Jay, Marie, and how we're all going to live - probably for the rest of our lives. Twenty years ago you-both of us-we'd have done something. Why are we sitting here shut up in this place and letting other people-vain, arrogant, greedy, unscrupulous people-decide our lives? Why aren't we doing something? It's that. I can't stand it." desperate with fear and fierce with anger. She surprised herself when she choked out a strangled cry, whole-of-limb, hard-bodied, martial arts wunderkind. The Klonk way wasn't the way of the Ninja. The Helicopter rotors.."Often enough that it seems like always." "I don't see the strings." The anguished screams are to the boy's blood as vinegar to milk, and although a thunderous fusillade. As might be expected in an ancient and fully furnished mobile home available for by-the-week rental, the Pernak remained unsmiling, "What about that ship sitting twenty thousand miles out in space?" he said..The relief detachment from B Company marched from the exit of the shuttle to take up positions in from of the ramp, and Sirocco stepped forward to address the advance guard. "Ship detail, atten-shun! Two ranks in marching order, fall . . . in!" The two lines that had been angled away from the lock re-formed into files behind the section leaders. "Sentry details will detach and fall out at stations. By the left... march!" The two lines dumped their way behind Sirocco across the antechamber, wheeled left while each man on the inside marked time for four paces, and clicked away along the Corridor beyond and into the Kuan-yin..A carrier full of combat-suited infantry nursing antitank missile launchers and demolition equipment slid through the lock and lurched onto a branch leading to one of the Battle Module's forward ramps. "Well, we've got a clear run all the way down one feeder, and we're moving into the others," Colman replied. "There's been some fighting inside the Battle Module, and a lot of the guys got out. We have to hope that there aren't enough left to stop us from blowing our way in through four places at once. Just tell Borstein to keep sending through all the heavy stuff he can find, as fast as he can get his hands on it." Noises in his wake suggest that the killers are trying to track him.
